Column Definitions

Referring Sites

A web site that refers a visitor to your site by linking to it.

Site

The specific referring site being analyzed.

Visits

Number of times the specified site referred visitors to your site.

%

Percentage of referrals that came from the specified site.

Direct Traffic

Represents traffic to the web site with no referrer as one of the following: 1) the visitor typed the domain name directly into their browser, 2) the visitor bookmarked the site, 3) the visitor clicked on an email, shortcut, or other direct link, 4) Firewalls and/or proxies stripped out the referrer and replaced it with a dash "-".

Note: If "Direct Traffic" is 100% of all your traffic, then you are probably not logging the "referrer" field in your log files. Please see your manual or the Webtrends Knowledgebase to enable extended logging on your web servers.

Hidden-Referrer

A value indicating that Internet security software such as Zone Alarm Pro, Symantec's Norton Internet Security, or a proxy server modified a web request to mask the referring URL.

Report Descriptions

You can use this page to determine which sites are referring the most visitors to your site. This can help when considering the most effective ways and places to attract visitors.
